## ONE VOICE, MANY LIVES

Dear Aliana,

I'm so glad you've decided to become a teacher.

We've had generations of teachers in our family line—your grandfather and my grandmother; your mum, uncle and aunts; my mum and dad, my siblings and I, ... the list goes on!

Someone once said this:

On the other hand, the fact that the mountain is still standing after 140 years of intense erosion is a testament to the strength of its structure. The mountain is made of a hard, crystalline rock called granite, which is resistant to erosion. The mountain is also surrounded by a thick layer of snow, which helps to protect it from the elements. The mountain is a natural wonder and a popular destination for hikers and tourists alike. The mountain is a reminder of the power of nature and the importance of preserving our natural resources.
