HOURS
AN SULTAN

Perhaps in the not too distant future, if things go as the government desires, a subterranean train line will be running 10 storeys beneath the very foreground of this picture. This view itself may be altered drastically; how much we do not know. What we do know is this portion of Chinatown - a half kilometre stretch of Jalan Sultan - has been earmarked for the MRT development leading towards a proposed terminal very near Stadium Merdeka just up the hill.
