

The DOSM's Kawasanku Portal

This portal provides some interesting data on your local area by Parliamentary & State Constituencies as well at the District level.

According to DOSM it provides answers to questions like:-

1. " How does my area shape up against other areas?
2. What are its demographics?
3. What are labour conditions like?
4. Does it have adequate public services?"

This is the first time DOSM has released population data at Parliament Constituency and State Legislative Assembly levels.

CSOs should find this useful for research and advocacy work.

Check it out at link below:-
